WARRANTY

- ⚡ Dual Copper Heat Tubes
- 🕒 High-Speed Cooling Fan
- 🔒 Zinc Alloy Sealed Body
- 🔌 Plug & Play Fitment

"Twelve fitments. One uncompromising standard — the same chipset, the same copper heat path, the same fan-cooled body in every box."

THE ENGINE BEHIND THE LIGHT

Built on One Uncompromising Platform

Every fitment runs on the identical internal platform.

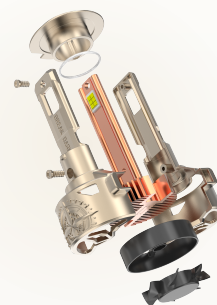

From the smallest fog lamp bulb to the largest dual-beam headlamp, NeuMatrix bulbs share one light engine, one cooling architecture and one sealed housing. Only the base and connector geometry change, so the bulb seats correctly in your headlamp, while output and service life stay the same across the range.
